C-O-S-F-I-D-E-N-T-I-A-L INFORMATION REPORT		This material contains information affecting the National Defense of the United States within the meaning of the Espionage Laws, Title 18, U.S.C. Secs. 793 and 794, the transmission or revelation of which in any manner to an unauthorized person is prohibited by law. 25X1			
PREPARED AND DISSEMINATED BY CENTRAL INTELLIGENCE AGENCY					
COUNTRY Hungary					
SUBJECT The War Technical Institute/ Defense Ministries		DATE DISTRIBUTED 18 September 1957	NO. OF PAGES 3	NO. OF ENCLS. 1	SUPPLEMENT TO REPORT # 25X1
THIS IS UNCLASSIFIED INFORMATION					
<p>1. The Nadi Technikai Intézet--NTI--(War Technical Institute) operated in several places in Budapest. The largest and main place of operations was located on Malinovszki fasor. This institute covered a large area, extending for several blocks along the street. Its several buildings were located among dense trees. It is just five blocks from the new St John's Hospital and near another hospital which was for the private use of high-government officials. Many NTI officials lived on a high hill adjoining the Malinovszki fasor property. These houses had a good view of the entire area. 25X1</p> <p>[redacted] the view was exceptional, however, the institute's buildings were so concealed by trees that many could not be seen. 25X1</p> <p>2. The NTI has offices and laboratories in the AVH Building which is located on Blaha Lujza ter next to the Margarite Bridge. This location was very confidential.</p> <p>[redacted] Only those working for NTI are permitted to enter either place. All personnel were army uniforms. 25X1</p> <p>[redacted] The army uniform was the best way to identify certain people who worked for NTI.</p> <p>3. The NTI used several other buildings, but all personnel in these places wore civilian clothing because of the organization's secret classification. It was difficult to be certain of the identification and location, also, it was very dangerous to ask questions concerning its locations or its work. 25X1</p> <p>4. [redacted] the NTI had received approximately 100 highly-specialized scientific research instruments for use in weather, infra-red, cosmic ray, and high-altitude studies. The instruments were to be sent aloft in balloons and transmit observations by radio. All equipment came from the USSR.</p> <p style="text-align: right; margin-right: 100px;"><i>PH</i> <i>Folder 2</i></p>

5. [redacted] MTI was involved in research and development in bacteriological warfare or other microbiological programs, however, in view of the number of chemists working for MTI, it is possible that they were doing work in both. All the top leaders of MTI were military men, many of whom were placed there because of politics. It appeared most of the scientists and technicians were young people. Older and more experienced scientists were called in for short periods. There was considerable turnover in the older, more able scientists. [redacted] 25X1
they were used mostly to teach the younger people.
6. The MTI was controlled and administratively responsible to Honvéslelmi Miniszterium (Ministry of Defense). Everyone connected with the ministry, like MTI, could be identified by their military uniforms.
7. Another ministry that could be easily identified because everyone connected with it wore a special uniform similar to a soldier's, but with easily recognizable differences. This was the Belugyminisztérium (Interior Ministry). This ministry controlled the organization Légoltalmi Rendőrség (LR) and another organization Ollqmédelmi Hatóság known as AVH. Both these organizations wore the special uniforms of the Belugyminisztérium. The head officials of the Interior Ministry were changed quite often. In most cases, no reasons were given for making these changes.
8. [redacted] the location or locations of LR but, this organization has a great number of chemists working for it. [redacted] two girls who worked for this organization [redacted] were working in the war-gases division. 25X1
25X1
9. The AVH also had a considerable number of chemists working for it. Chemists, who went to work for this organization, were required to work for a specific length of time in a penicillin plant before reporting to the AVH. 25X1
10. [redacted]
11. Another ministry that was charged with defense and security was the Körép Gépipari Miniszterium. This name was changed to Kohóes Gépipari Miniszterium. This name may have been changed again [redacted]. It is located right near the US Embassy on the corner of Szavadsag ter and Mador ter. 25X1
This ministry controls a larger field and is more diversified than the other two ministries. All people connected with this ministry and its institutions wore civilian clothing. This ministry did research in uranium, arms, airplanes, explosives, and had factories with laboratories working undercover. For example, a factory that was actually making arms would be advertised as making pots and pans.

25X1

A. MTI - Magyar Technikai Intézet (War Technical Institute) is located on the west side of Malinovszki fasor, about five hundred feet west of St Janos Hospital. It is just off the map to the west. The area of the MTI along Malinovszki fasor includes three bus stops.
